

## Special Issue

# Disorders of Mitochondrial Metabolism

### Message from the Guest Editor

Disorders of mitochondrial metabolism are a phenotypically and genetically diverse group of diseases which can affect any organ or tissue of the body, although organs with high energy demands such as the brain and muscle tissue are generally most susceptible. One of the major causes of impaired mitochondrial metabolism are mitochondrial respiratory chain (MRC) disorders which have an estimated incidence of 1 in 5000. MRC dysfunction can present at any age and result from mutations in either mitochondrial or nuclear DNA and therefore both matrilineal and Mendelian inheritance patterns are exhibited by families with these conditions. In addition to primary genetic causes, MRC dysfunction may also result from the secondary consequence of disease pathophysiology as well as from `off target` drug toxicity. The purpose of this Special Issue will be to present a selection of studies and reviews that outline the causes and consequences of primary and secondary MRC dysfunction, including putative mechanisms of mitochondrial impairment, appropriate diagnostic biomarkers of disease pathophysiology and candidate therapies.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
