# Basic and Translational Models of Cooperative Oncogenesis 2.0

# Message from the Guest Editors

We invite investigators to contribute original research articles and review articles describing and discussing the genetic programmes at the basis of cooperative tumourigenesis, using basic and translational experimental models. Potential topics include, but are not limited to, the following:

- Intrinsic tumour suppression
- Cancer initiation migration, invasion, and metastasis
- Cancer metabolism
- Tumour-stroma interactions
- Cancer-related cell death
- Organotypic models of cancer
- Cell polarity and cell division in cancer
- Cancer stem cells
- Drug discovery

# Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
