# State-of-the-Art Molecular Immunology in Germany

### Message from the Guest Editor

A large number of research teams in Germany from different institutions and universities are working together to study the molecular mechanisms of immunity, immunogenetics, and/or immunopathogenesis. This Topical Collection of the *International Journal of Molecular Sciences (IJMS)* aims to rapidly publish original contributions addressing questions of importance in immunology and related fields from Germany. We welcome manuscripts conveying novel experimental findings that may advance our understanding of the molecular mechanisms of immunity, immunogenetics, and/or immunopathogenesis. Manuscripts reporting on the development or testing of novel therapeutics that target molecular mechanisms are likewise sought.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
