State-of-the-Art Molecular Immunology in Italy

Message from the Guest Editors

A large number of research teams in Italy from different institutions and universities are currently working together to study the molecular mechanisms of immunity, immunogenetics and/or immunopathogenesis. This Special Issue of the *International Journal of Molecular Sciences (IJMS)* aims to rapidly publish original contributions addressing questions of importance in immunology and related fields from Italy. We welcome manuscripts conveying novel experimental findings that would advance the understanding of molecular mechanisms of immunity, immunogenetics and/or immunopathogenesis. Manuscripts reporting the development or testing of novel therapeutics that target molecular mechanisms are also welcomed.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
