Pharmacology of Hormones, Peptides and Growth Factors in Systemic Cross-Talk

Message from the Guest Editor

The scope of this Special Issue is to shed light on the pharmacological effects of endogenous hormones, peptides and growth factors as crucial communicators during normal physiology, disease states and aging. We will be accepting submissions in the form of original articles and review articles that are focused on studying the molecular mechanisms and influences of hormones, endogenous peptides and growth factors in regulating disease states and aging. We look forward to receiving your original and outstanding contributions for this Special Issue.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
