

# Special Issue

## Liver Cancer 2.0

### Message from the Guest Editor

Liver cancer is one of the most common cancers and is the leading cause of death worldwide. Since there are no subjective symptoms in the early stages, it is generally at quite advanced stage when it is discovered. Chronic liver damage often sets the stage for the oncogenic transformation of liver cells giving rise to liver cancer. Risk factors for this transformation include excessive smoking, alcohol consumption and hepatitis B and C viral infections, all of which can cause mutations in healthy DNA. These mutations can result in the deregulation of genes involved in controlling cell growth, cell death, and cell differentiation, thereby contributing to liver carcinogenesis. In this special issue, we will try to provide the information which would be beneficial for basic scientists to medical doctors in the field of liver cancer research. We will mainly consider the below listed topics but not limited.

### Guest Editor

Dr. Hiroaki Taniguchi

Institute of Genetics and Animal Biotechnology of the Polish Academy of Sciences, 05-552 Jastrzebiec, Poland

### Deadline for manuscript submissions

closed (31 May 2023)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
