

## Special Issue

# New Molecular Targets in Lung Cancer

### Message from the Guest Editors

For decades oncologists have been convinced that advanced non-small-cell-lung cancer (NSCLC) was a unique disease with an invariable rapid progression and with platinum-based chemotherapy as the only available option for metastatic patients with acceptable performance status. This is the case of EGFR mutated or ALK-, ROS1- or RET- rearranged NSCLCs, where targeted agents have changed the natural history of disease. The goal of personalized medicine is to assure the right treatment to the right patient and on these perspectives a growing number of other potential druggable targets is rapidly emerging. Unfortunately, even with the most appropriate treatment, patients did not obtain a definitive cure and they became refractory to targets agents due to the emergence of acquired resistance. This Special Issue focuses on current research findings related to molecular mechanisms guiding lung tumor biology, response to therapy and acquired resistance. We invite authors to contribute with either original researches or review articles.

### Guest Editors

Prof. Dr. Federico Cappuzzo

Department of Oncology-Hematology, AUSL della Romagna, Ravenna, Italy

Dr. Serena Ceddia

Medical Oncology Unit, University Sapienza, Rome, Italy

Dr. Lorenza Landi

Medical Oncology Unit, National Cancer Institute Regina Elena, Rome, Italy

### Deadline for manuscript submissions

closed (31 July 2022)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
