Cannabidiol: New Vistas of Its Molecular Mechanisms, Biological Effects and Therapeutic Application

Message from the Guest Editors

The hemp plant *Cannabis sativa* L. contains hundreds of constituents and dozens of cannabinoids. The first of the two major cannabinoids is Δ^9 -tetrahydrocannabinol, which is psychoactive and has a marked effect on the endocannabinoid system (e.g. on cannabinoid receptors). The second major cannabinoid, cannabidiol, is not psychoactive and has less pronounced effects on the endocannabinoid system; among others it possesses a marked direct anti-oxidant, an anti-apoptotic and an anti-inflammatory effect. This Special Issue will focus upon cannabidiol (and not include other cannabinoids or mixtures of cannabinoids), all the more since such an issue is missing.

Cannabidiol has recently been licensed both in the United States and in Europe for the treatment of the Dravet and Lennox-Gastaut syndromes, rare forms of childhood-onset epilepsies. The compound is also being considered for the treatment of other disorders although its molecular mechanisms and biological effects have not yet been fully elucidated. We are inviting colleagues interested in all aspects of cannabidiol to contribute to this Special Issue by submitting original papers, short communications or reviews.

Guest Editors

Prof. Dr. Barbara Malinowska
Prof. Dr. Eberhard Schlicker
Prof. Dr. Roger G Pertwee

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
