

Special Issue

Molecular Research on Cardiomyopathy

Message from the Guest Editor

The field of cardiovascular medicine has broadened as technologies evolve. More importantly, clinically relevant discoveries have grown exponentially with genomics, improvements in stem cells, inter-organ and systemic approaches, and cardiotoxicity side-effects of cancer drugs and a variety of other therapeutics. It is becoming increasingly apparent that the heart is inexorably linked to multiple human disease conditions. As such, the molecular underpinnings of non-cardiac processes have emerged with new relevancy to cardiac disease. Contributions to this Special Issue will provide insights into novel mechanisms of action that contribute broadly to cardiomyopathies of multiple etiologies and suggest therapeutic interventions for meeting new challenges in heart health.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
