Special Issue

Models of Drug Addiction: Translating Molecular Targets into Molecular Medicine

Message from the Guest Editor

Each year, novel models/experimental procedures are added to the repertoire of methods that researchers can apply to examine various aspects of addiction. A major problem in the field is that models are not discarded when overwhelming evidence indicates that they are not valid or are fatally flawed. The adherence to these 'tried and true' invalid models inhibits the progression of the field and reduces the impact of novel, and potentially important, models. The goal of this Special Issue of the *International Journal of Molecular Science* is to provide the field with theoretical discussions on the plethora of addiction models available. We encourage all authors to take positions, and we would welcome co-authored manuscripts from researchers with divergent opinions.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino
Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
