Molecular Signaling Pathways in Brain Pathology

Message from the Guest Editor

Dear colleagues, I am serving as the guest editor of the Special Issue “Molecular Signaling Pathways in Brain Pathology” in the *International Journal of Molecular Sciences*. In the past, diseases such as glioblastoma or multiple sclerosis were associated with abnormal signaling, including changes in FGF/FGFR pathways; patients with glioblastoma were or are being treated with FGFR tyrosine kinase inhibitors. It is my pleasure to invite you to contribute to this Special Issue by submitting an original research article or comprehensive review related to the above topic. The submission deadline is 31 August 2022. Manuscripts may be submitted at any time before the deadline, as they will be published online on an ongoing basis.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
