

## Special Issue

# Exploiting the Multitarget and Repositioned Drugs Approach

### Message from the Guest Editor

This Special Issue will present a collection of papers and case studies, focusing on highly relevant subjects like multifactorial, neurodegenerative, cardiovascular and metabolic diseases, and cancer, based on experimental (synthesis, enzymatic assays) and theoretical (computational and modelling studies) techniques, unravelling unexpected polypharmacological effects for novel synthetic as well as natural compounds. It will present original research and protocols to shed light on this very challenging, but attractive, field, and short communications and reviews will also be welcomed.

---

### Guest Editor

Dr. Antonio Carrieri

Department of Pharmacy-Drug Sciences, University of Bari "Aldo Moro", Via E. Orabona 4, 70125 Bari, Italy

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
