

## Special Issue

# Molecular Targets and Immunotherapy for Autoimmune Diseases

### Message from the Guest Editor

In this Special Issue, we aim to provide a comprehensive overview of the pathophysiological mechanisms of autoimmune diseases. We welcome manuscripts that address the deeper signaling pathways with the purpose of identifying novel molecular targets in autoimmune diseases. In this Special Issue, we give special emphasis to emerging targeted immunotherapies that can provide effective, safe, and long-term immune tolerance. We encourage the submission of review articles as well as original research papers.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
