Antibodies in Cancer Therapy

Message from the Guest Editor

Antibodies can specifically recognize exogenous antigens and cure infectious diseases. These days, immunological therapies utilizing antibodies have come to be a medical solution in cancer therapy. Chemicals or radioisotope conjugation can aid in cancer diagnosis and therapy. In addition, antibody-fused receptors, CARs, and antibody-TCR fusion receptors have been recognized as main actors. In this regard, cancer-specific target antigens are important. If we can use cancer-specific exogenous or endogenous antigens or neo-antigens, cancer therapy will accelerate its pace.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
