Special Issue

Nanotechnology in the Treatment and Diagnosis of Cancer: Opportunities and Challenges

Message from the Guest Editor

The aim of this Special Issue is to create a space in which you will be able to share with a wide audience the results of research relating primarily to the use of nanotechnology in the diagnosis and treatment of cancer, but also focusing on the assessment of the safety of used nanomaterials. This Special Issue is supervised by and assisted by our Topical Advisory Panel Member, Dr. Magdalena Matysiak-Kucharek (Institute of Rural Health).

- nanomaterials
- cancer
- nanomedicine
- biological effects
- cancer therapy
- metastasis

If you have any interest in our issue, please never hesitate to contact us.

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
