

Special Issue

Natural Killer T (NKT) Cells

Message from the Guest Editor

This Special Issue, "Natural Killer T (NKT) Cells", will cover a selection of recent research topics and current review articles in this field. Experimental papers, up-to-date review articles and commentaries are all welcome. Natural killer T (NKT) cells represent an exceptional lymphocyte population uniting a T cell and natural killer cell-like phenotype with tumor-killing activity. Most NKT cells recognize the antigen-presenting molecule CD1d. NKT cells are classified into type 1 invariant, type 2 diverse and NKT-like cells. NKT cells have been shown to play an essential role in autoimmune diseases as well as in cancer. NKT cells are present in peripheral blood mononuclear cells or cord blood in low numbers but can be expanded in vitro. Most clinical trials with NKT cells have been performed with cytokine-induced killer (CIK) cells. CIK cells are licensed, e.g., in Germany. Due to their easy availability and potent antitumor activity, NKT cells have emerged as a promising immunotherapy approach in oncology and may gain major importance in the prognosis of cancer.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (IJMS, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. IJMS publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in IJMS and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

*Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy*

Author Benefits

Open Access:

*free for readers, with article processing charges (APC) paid
by authors or their institutions.*

High Visibility:

*indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, MEDLINE, Embase, CAPlus / SciFinder, and other
databases.*

Journal Rank:

*JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)*
