

## Special Issue

# Molecular and Ionic Dynamics by Means of Nuclear Magnetic Resonance 2.0

### Message from the Guest Editor

Nuclear magnetic resonance (NMR) is considered one of the most powerful techniques for investigating molecular and ionic dynamics. The highly-developed, extremely versatile NMR methods are used for the study of all types of soft matter and solid systems. The applications range from simple liquids to various kinds of solids and even tissues. The great advantages of NMR methods include the broad time scale of the dynamic processes probed, the unique potential to reveal the underlying mechanism of motion, and the atomistic resolution. There are numerous examples of scientific problems addressed by NMR: mechanisms of ionic motion and diffusion paths in novel solid and liquid electrolytes, efficiency of tailored contrast agents based on magnetic resonance imaging, and dynamical properties of polymers and dendrimers. This Special Issue is meant to provide an extensive overview of a variety of applications of NMR-based experimental methods, accompanied by parallel theoretical development, for the purpose of demonstrating their potential for interdisciplinary studies involving material sciences, physics, chemistry, biology, and medicine.

### Guest Editor

Prof. Dr. Danuta Kruk

Faculty of Mathematics and Computer Science, University of Warmia & Mazury in Olsztyn, Stoleczna 54, 10-710 Olsztyn, Poland

### Deadline for manuscript submissions

closed (31 May 2022)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
