

## Special Issue

# Primary and Secondary Bladder Disorders in Neurourology and Inflammatory Diseases

### Message from the Guest Editors

The urinary bladder functions as a temporary storage reservoir for urine. Primary disturbances of the bladder may stem from overactivity, underactivity, and interstitial cystitis. Alterations in neurourology and medication-related insults contribute to secondary bladder dysfunction. Despite the bothersome symptoms it may induce in patients, bladder dysfunction is frequently overlooked in clinical settings. In recent years, innovative treatments for bladder dysfunction, such as regenerative medicine, botulinum toxins, and nanoparticles, have garnered attention. Novel urinary biomarkers could facilitate disease screening and the discovery of new etiologies. In addition, the emerging insights into microbiota and the microbiome may contribute to the development of bladder dysfunction research. In this Special Issue, preclinical studies and molecular investigations in patients concerning this matter are welcome. We also invite scientists and physicians to publish their research on this subject, encompassing both pathology and treatment strategies.

### Guest Editors

Dr. Wei-Chia Lee

Department of Urology, Kaohsiung Chang Gung Memorial Hospital and Chang Gung University College of Medicine, Kaohsiung 833, Taiwan

Dr. Yung-Shun Juan

Department of Urology, College of Medicine, Kaohsiung Medical University, Kaohsiung 80708, Taiwan

### Deadline for manuscript submissions

closed (20 December 2025)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
