

## Special Issue

# Nanoparticle and Immunotherapy: A Promised Joint Method for Cancer Treatment

### Message from the Guest Editor

In the past decade, great efforts have been made to fight cancers. However, theranostic efficacy is still limited by various factors such as drug resistance and autoimmunity. Recently, nanotechnology-based synergistic therapies demonstrated promise in cancer treatments. For example, the nanotechnology is widely used to reliably activate/reinvigorate T cells for combined strategies during cancer immunotherapy. This Special Issue will focus on the recent advances in the nanotechnology-based theranostics and cancer immunotherapy. Participation with research articles and reviews in the field of nanomaterials, immunotherapy, and cancer theranostics is highly encouraged. While the Special Issue is associated with but not limited to “nanoparticle and immunotherapy”, related works and progress are also encouraged. The research of “nanoparticle and immunotherapy” involves materials science, biology, and chemistry. Such fields are challenging and with ample opportunities.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
