

## Special Issue

# Nanostructured Formulations in Pharmaceutical, Medical and Cosmetic Applications

### Message from the Guest Editor

This Special Issue focusses on the recent progress in the design, engineering, and physicochemical evaluation of novel nanostructured formulations and their potential in pharmaceutical, medical, and cosmetic applications. It will include research papers and review articles reflecting the most recent developments in this dynamic research area, including “soft” and surface-modified nanostructures such as lipid-based (vesicular and non-vesicular origin) and polymer-based (nanocapsules, nanomicelles, nanospheres, dendrimers, polymersomes, nanogels). Papers involving recent research and achievements in the fabrication of novel lipid-polymer and organic-inorganic nanohybrids are also welcome.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
