

Special Issue

Advances in Nanostructured Photovoltaics

Message from the Guest Editors

Photovoltaics are generally regarded as one of the most promising and environmentally friendly energy sources. Nanostructured photovoltaics have shown great potential as the future renewable energy source, with high efficiency and low-cost features. This present Special Issue aims to highlight recent comprehensive research advances in nanostructured photovoltaics. This includes the development of novel nanostructured solar cells, newly developed nano-photovoltaic absorbers, advanced strategies to enhance light harvesting, advanced modeling analysis for nanostructured photovoltaics, and advanced system applications of photovoltaics.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
