Bioactive Molecules from Food or Other Natural Sources against Cancer

Message from the Guest Editors

Cancer is a major health problem with a considerable social impact and high socio-economic costs. The fight against cancer is realized by developing innovative drugs and novel therapeutic strategies aimed to cure the disease and/or to prevent it.

Another approach to prevent cancer is following a combination of a healthy life style and diet habits, employing “food as medicines”. Indeed, it has been suggested that high dietary intake of fruits and vegetables could prevent some type of cancer, reducing their incidence. This approach to maintain health status, often achieved by food supplements, functional and fortified foods, has a great impact on population, as suggested by the ever-increasing popularity of these products.

This Special Issue will focus on the role of bioactive molecules from food and other natural sources on cancer prevention and treatment. When dealing with extracts, Authors must include an accurate qualitative-quantitative chemical composition of them.

The Authors are mainly invited to submit original articles, reviews and meta-analysis.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
