

## Special Issue

# Neurobiology of Vision in Health and Disease

### Message from the Guest Editors

This special issue will focus on genetics, epigenetics and signaling pathways in neuroretinal cells in homeostasis and in disease. We invite research studies and reviews on genetics of retinal, macular and optic nerve degeneration, gene expression patterns in neuroretinal cells and those associated with retinal cell dysfunction and death, retinal cell metabolism, studies exploring the crosstalk between inflammation, microglial cell activation and neuroretinal cell function, as well as studies on innovative therapeutic interventions and drug delivery.
