Neurogenesis and Neural Plasticity 2.0

Message from the Guest Editors

Neuronal regeneration and plasticity is greatly impaired in adult brains where the survival and integration of new neurons generated from neural stem cells (NSCs) are extremely low. These processes not only worsen with aging but also with individual lifestyle, prompting urgency in discovering new strategies that compensate for neurogenesis and cognitive decline. Curiously, recent evidence has suggested that adult NSCs may also improve neural plasticity by not only generating new cells but also through a paracrine mechanism. In addition, individual metabolism and gut microbiome may also influence these processes in an age-dependent manner. Here, we invite investigators to contribute original research and review articles that aim to boost the development of adult neurogenesis and neural plasticity therapies. We are interested in articles from basic research to clinical applications in both animal and human models.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
