

Special Issue

Responsible Factors for Neuromorphogenesis in the Brain

Message from the Guest Editor

The Special Issue will publish original articles on molecules responsible for controlling the morphology of neurons as well as review articles on the responsible proteins that have been implicated in the regulation of neuronal morphogenesis. We seek articles that focus not only on molecules in development but also on molecules regulating neuronal morphology in the adult brain in any model systems, including fish, flies, worms, and mammals. It is also encouraging to submit articles regarding regulatory molecules implicated in disease-related processes, such as axon regeneration.

Guest Editor

Dr. Kazuhito Toyooka

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles

Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
