

Special Issue

Neuropeptides and Myopeptides

Message from the Guest Editor

Dear colleagues, Orexin and Irisin are two peptides involved in the normal physiology of nutrition and physical exercise. There are many studies on the functions of orexins, less on those of irisin, but there is no doubt that our knowledge about these is still limited. Broadening this knowledge would undoubtedly open paths to better human health management. For these reasons, I invite you to send papers regarding the role of orexin and/or irisin in regulating the physiology of nutrition and/or exercise, or possible changes that nutrition and/or exercise make on the circulating levels of these peptides, or how these peptides perform basic functions for maintaining health and how we could use them in medicine.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
