Inherited Disorders in Neurotransmitters: A Molecular, Cellular and Systemic Perspective 2.0

Message from the Guest Editors

This Special Issue entitled “Inherited disorders in neurotransmitters: a molecular, cellular and systemic perspective” addresses this research field and is focused on the research of the molecular cause of neurotransmitters deficiencies. It will include a selection of research papers and reviews about different aspects of neurotransmitters deficiency, with particular regard on the molecular and cellular level as well as a wider approach of system biology.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
