# The Role of Natural Products in Non-alcoholic Fatty Liver Disease

### Message from the Guest Editors

Non-alcoholic fatty liver diseases (NAFLD) are a vast spectrum of different diseases that affect up to 30% of the adult population. It is related to several comorbidities, such as type 2 diabetes and obesity. Moreover, it ranges from simple steatosis, considered a benign disease, to other diseases, such as steatohepatitis, liver cirrhosis and hepatocarcinoma. Due to the lack of effective pharmacologic agents, the scientific community is looking for new treatments. The use of natural products has emerged as an alternative therapeutic for the treatment of hepatic diseases. including non-alcoholic fatty liver disease, due to its anti-inflammatory, antioxidant, antidiabetic, insulinsensitizing, antiobesity, hypolipidemic, and hepatoprotective properties. We are pleased to invite you to participate in this Special Issue, "The Role of Natural Products in Non-alcoholic Fatty Liver Disease", by presenting your most recent research or ideas focused on the molecular-level studies between NAFLD and natural products. Experimental papers and up-todate review articles are all welcome.

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
