

## Special Issue

# Biotechnology of Non-conventional Yeasts

### Message from the Guest Editors

In this Special Issue we encourage the submission of papers (research papers or reviews) on the biotechnology of non-conventional yeasts. Non-conventional yeasts have stimulated increasing interest with the development of molecular means that have made it possible to know the genomic profile of several yeast species with promising biotechnological application.

The present Special Issue is focused on recent developments in non-conventional yeasts biotechnology, with topics including recent techniques for characterizing yeasts and their physiology (including omics and nanobiotechnology techniques), methods to adapt industrial strains (including metabolic, synthetic, and evolutionary engineering), and the use of yeasts as microbial cell factories to produce biopharmaceuticals, enzymes, alcohols, organic acids, flavors, and fine chemicals. There is also growing interest in the applications of non-conventional yeasts as starters for functional foods or fermented beverages, as well as producers of antimicrobial compounds.

---

### Guest Editors

Prof. Dr. Maurizio Ciani

Università Politecnica delle Marche, Ancona, Italy

Dr. Francesca Comitini

Dipartimento Scienze della Vita e dell'Ambiente, Università Politecnica delle Marche, Ancona, Italy

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
