Nutrient Metabolites and Their Receptors in Human Diseases

Message from the Guest Editor

The gut microbiota participate in food digestion, producing a variety of metabolites associated with both human health and disease. These nutrient- and diet-derived metabolites come in the form of short-, medium-, and long-chain fatty acids; secondary bile acids; microbial tryptophans; and other amino acid metabolites resulting from proteinolysis, branched-chain amino acids, phosphatidylcholine metabolites, choline, L-carnitine, and other metabolites derived from high-fat food digestion. There is great potential and ample opportunity to identify and characterize not only how all these metabolites are produced in the human body, but also their physiological actions in cells and tissues, as well as the receptors that mediate their cellular actions. Moreover, this exciting field remains unexplored. **Keywords:** diabetes; metabolic disorders; cardiovascular disease; receptor; signal transduction; fatty acid; amino acid; metabolism; inflammation

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
