

## Special Issue

# Gender Specific Results in Musculo-Skeletal Research, from Bench to Bedside

### Message from the Guest Editors

Male and female musculoskeletal tissues differ in several physiological features, ranging from cell molecular pathways and response to sex hormones, to anatomical and biomechanical aspects. Gender equity and equality should foresee the same opportunities to both sexes according to their specific needs, including the availability of adequate health service and medical treatments. To do that, it is paramount to have data that specifically document etiopathogenetic mechanisms, epidemiological distributions, as well as treatment responses in men and women.

This Special Issue aims to provide data from bench to bedside on sex- and gender-specific differences in musculoskeletal disorders, and to offer women appropriate treatments that are no longer based on male data. Since *IJMS* is a journal of molecular science, submissions with bio-molecular experiments will be prioritized. Due to the importance of the topic and the broader scope of this Special Issue, clinical submissions with biomolecular experiments are also encouraged.

---

### Guest Editors

Dr. Manuela Salerno

Dr. Francesca Taraballi

Prof. Dr. Giuseppe Filardo

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
