

Special Issue

Alcohol and Inflammation

Message from the Guest Editors

Excessive ethanol consumption may cause widespread organ dysfunction, leading to a constellation of severe diseases (e.g., pancreas and/or liver function impairment, various types of cancer, cardiovascular diseases, or nutritional disorders), that markedly shorten lifespan. An important mechanism underlying health derangement in excessive drinkers includes an enhanced inflammatory response, mainly triggered by ethanol/acetaldehyde-mediated bacterial overload in portal blood, and by the increased oxidative damage provoked by ethanol metabolism and acetaldehyde adducts. However, our knowledge regarding the proinflammatory effects of alcoholism is still incomplete, and that regarding the therapeutic role of antioxidants or cytokine-blocking agents is disappointing. Therefore, research is still needed in this field. This Special Issue aims to provide a platform for molecular mechanistic research on alcohol-induced inflammation, with a special focus on potential treatments and novel pathogenic pathways involved in inflammatory disease. We warmly welcome your submissions of original papers and reviews based on results from molecular viewpoints.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
