Molecular Insights in Biomodelling

Message from the Guest Editor

Biomodelling is a currently a very active research area, with potential applications ranging from medicine to ecology and agronomy and including biology, physiology, and genetics. A mathematical approach is required in order to model the physicochemical mechanisms underlying the phenomena under study. Research tools can be adapted from various sources, such as biomathematics, biostatistics, biophysics, theoretical biology or theoretical ecology, or bioinformatics. Their implementation can result in equations and/or numerical simulations explaining and/or reproducing the observed physicochemical reality. Proposals for concrete actions in medical applications, ecology, or agronomy often come about as a direct result of biomodelling and its elucidation of physicochemical mechanisms. We are therefore planning to launch a Special Issue devoted to molecular insights in biomodelling and we hope that you are interested in participating.

Guest Editor

Prof. Dr. Jacques Demongeot
Faculty of Medicine, University of Grenoble Alpes, AGEIS EA 7407,
38700 La Tronche, France

Deadline for manuscript submissions

closed (20 February 2026)

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
