Molecular Research and Immune Landscape of Breast Cancer

Message from the Guest Editor

Breast cancer (BC) is one of the most prevalent malignant neoplasias in women, presenting from low aggressive luminal subtypes to highly aggressive triple negative/basal-like subtypes. Different omics approaches along with single-cell analysis have allowed significant advances in the understanding of the immune landscape of breast cancer. In this context, changes in the tumor microenvironment have a strong impact on disease progression and metastatic dissemination. Also, the immune cell composition has been associated with response to therapy and the acquisition of chemo- and/or radiotherapy resistance. This Special Issue of the *International Journal of Molecular Sciences*, titled “Molecular Research and Immune Landscape of Breast Cancer”, aims at providing an updated overview of recent advances in the molecular research of breast cancer research, with particular emphasis on the immune cell landscape and its impact on disease progression and response to therapy. The formats for submissions include original research articles, brief communications, and reviews.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
