

## Special Issue

# Molecular Mechanisms of Environmental Stress-Induced Human Diseases

### Message from the Guest Editor

This Special Issue aims to explore the intricate molecular pathways underlying human diseases triggered by environmental stressors. Environmental factors such as pollution, climate change, and lifestyle choices are having an increasingly large impact on human health, contributing to a spectrum of diseases from metabolic disorders to cancer. Understanding the molecular mechanisms behind these diseases is crucial for developing targeted therapies and interventions. Articles published in this Special Issue will delve into the complex interactions between environmental stressors and biological systems at the molecular level, offering insights that pave the way for future advancements in disease prevention and treatment.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
