Abiotic Stress Tolerance in Plants: The Regulation of Reactive Oxygen Species and Plant Hormones

Message from the Guest Editor

Abiotic stresses can have negative impacts on crop yield worldwide due to the inhibition of plant growth and development. These stresses, such as low or high temperature, high salinity, heavy metals, and high CO₂ concentration, are already threatening to ensure sustainable agriculture in ecosystems. Reactive oxygen species (ROS) can be induced by oxidative damage to DNA, RNA, molecules, and lipid peroxidation, and can lead to cell destruction in plants. Furthermore, plant hormones, such as abscisic acid, auxin, brassinosteroid, gibberellin, cytokinin, ethylene, salicylic acid, jasmonate, and strigolactones, are known to play crucial roles in the stress responses of plant. Various molecular and computational approaches are used to find genomic clues associated with stress tolerance in the regulation of ROS and hormones. This Special Issue of the *International Journal of Molecular Sciences* journal, titled "Abiotic Stress Tolerance in Plants: The Regulation of Reactive Oxygen Species and Plant Hormones", aims to summarize these views.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
