# OSM/OSMR and Interleukin 6 Family Cytokines in Physiological and Pathological Condition

### Message from the Guest Editor

The interleukin-6 family is a group of cytokines with shared signaling properties, among which IL-6, Oncostatin M (OSM), leukemia inhibitory factor (LIF), and IL-31. They bind to a gp130/OSM receptor (OSMR) heterodimer complex or to a gp130/LIF receptor (LIFR) complex, while IL-31 binds to the OSMR/IL-31 receptor (IL-31R) complex. The receptor binding triggers several signaling pathways, among which Jak/STAT, the Ras-MAPK, the PI 3-K-Akt, the p38, and JNK MAPK pathways. Both OSM and OSMR have been implicated in a variety of biological functions, including cell growth, neuronal development, and inflammatory responses. Their role has been also reported in several inflammation-related diseases and cancers and their potential as a therapy target suggested. This Special Issue aims to uncover every aspect of IL-6 family cytokines and in particular OSM and/or OSMR functioning and signaling cascade that might unravel their role in both physiological and pathological conditions.

### Guest Editor

Dr. Francesca Lantieri

Dipartimento di Scienze della Salute, Sezione di Biostatistica, Università degli Studi di Genova, 16132 Genoa, Italy

### Deadline for manuscript submissions

closed (10 March 2022)

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. José L. Quiles  
Department of Physiology, Institute of Nutrition and Food Technology  
"Jose Mataix", Biomedical Research Center, University of Granada,  
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
