

## Special Issue

# Organoid Platforms for Personalized Medicine

### Message from the Guest Editors

Recent advances in stem cell and developmental biology have propelled the design of three-dimensional (3D) organoids that are able to mimic different organs in vitro, including the breast, brain, intestine, pancreas, prostate, amniotic sac, liver, gastric, and optical cup. These organoid models have been shown to be able to reflect human tissue during early embryogenesis, permitting the investigation of the interactions between different cell types within the developing organ as well as the self-organization processes that lead to its functional tissue cytoarchitecture and how the organ is affected in different developmental diseases. Moreover, patient-derived organoids (PDO), including those derived by the culture of tumor biopsies, have been shown to not only recapitulate key aspects of the disease in vitro but also be predictive of the therapy response in patients, thus constituting an elemental tool for personalized medicine. This Special Issue will be dedicated to publishing original work and reviews using organoids in the areas of pharmacology, bioinformatics, cell and cancer biology, drug screenings, bioengineering, genetics, etc.

### Guest Editors

Dr. Guillermo Gomez

Centre for Cancer Biology, SA Pathology and the University of South of Australia, Adelaide, SA 5000, Australia

Dr. Oliver Sieber

1. Personalised Oncology Division, The Walter and Eliza Hall Institute of Medical Research, Parkville, VIC 3052, Australia

2. Department of Medical Biology, The University of Melbourne, Parkville, VIC 3052, Australia

### Deadline for manuscript submissions

closed (31 March 2021)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
