

## Special Issue

# Osteoclast Multinucleation Mechanisms

### Message from the Guest Editor

This Special Issue aims to cover a selection of recent research topics and current review articles related to osteoclast multinucleation. Since multinucleation is also observed in macrophages, and multinucleated macrophages have potential similarities to osteoclasts, we also welcome research and reviews characterizing the mechanisms of macrophage multinucleation, which will give us additional insights into the mechanisms underlying osteoclast multinucleation. Up-to-date review articles, commentaries, and experimental papers are all welcome.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
