

Special Issue

Osteoclast Multinucleation Mechanisms 2.0

Message from the Guest Editor

The main aim of this Special Issue is to cover a selection of recent research topics and current review articles related to osteoclast multinucleation. However, multinucleation is also observed in other somatic cells and has non-negligible similarity, so in this second volume, we also welcome research and review articles characterizing the multinucleation mechanisms observed in somatic cells, which will give us additional insights into the mechanisms underlying osteoclast multinucleation. Up-to-date review articles, commentaries, and experimental papers are all welcome.

Guest Editor

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
