Novel Therapeutic Approaches for Migraine Headaches

Message from the Guest Editors

Migraines and chronic headaches remain among the most disabling conditions. Novel approaches, ranging from new pharmacologic and molecular therapeutics to novel, more effective protocols of already-used drugs such as botulinum toxin and anti-CGRPs are highly warranted to help migraines. In some conditions such as occipital neuralgia, normally considered very rare, there is a clear dysfunction of the occipital nerves, but there is a lack of effective treatment options, with this condition remaining largely underestimated. Cluster headaches are rarer but are among the worst and most intense types of headaches; more effective strategies of treatment are highly needed. This Special Issue aims to bring together clinical experts to develop guidelines for the diagnosis and treatment of migraine, chronic headaches, cluster headaches occipital neuralgia and neurological disorders, focusing on insights and advances at the genetic and molecular levels.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
