

Special Issue

Novel Molecular Pathways in Oncology, 3rd Edition

Message from the Guest Editor

Oncology research continues to reveal the molecular signatures that define tumor characteristics and behavior, with the focus increasingly shifting toward the complex molecular pathways implicated in tumorigenesis, cancer cell proliferation, inflammation and angiogenesis, tissue infiltration, and dissemination to distant sites. New research should focus on better investigating the molecular mechanisms that promote cancer and on the development of efficient therapeutic and pharmacological interventions. For this Special Issue, we welcome research and review articles focusing on the diverse molecular mechanisms implicated in different steps of carcinogenesis, which could serve as therapeutic targets.

Guest Editor

Dr. Giovanna Casili

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
