

Special Issue

Research Progress of Bioimaging Materials

Message from the Guest Editors

In this Special Issue, we are committed to integrating different materials, nanotechnology and simulation approaches for providing sufficient and efficient references in investigations. According to the characteristics of bioimaging materials, nanotechnology-based synergistic therapies demonstrated promise in tissue engineering or cancer treatments. For example, physical approaches such as ultrasonic ablation are spatially distributed and change with time, and chemical works such as different inorganic functional materials are utilized in imaging diagnosis and further treatments. This Special Issue will focus on the advances in the fields of novel imaging materials, cancer theranostics, physical simulation and calculations, etc. It is associated with but not limited to "Bioimaging Materials", related works and progress are encouraged. It involves materials science, biology, chemistry and physical simulation. Such fields are challenging and with ample opportunities.

Guest Editors

Dr. Liangcan He

School of Medicine and Health, Harbin Institute of Technology, Harbin 150001, China

Dr. Jing Mu

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
