

## Special Issue

# Molecular Research Progress of Familial Mediterranean Fever

### Message from the Guest Editor

Familial Mediterranean fever (FMF) is the most common inherited inflammatory disorder. The disease is characterized by self-limited, recurrent attacks of fever, accompanied by pain in the abdomen, chest, or joints and complications of amyloidosis. FMF predominantly affects Turks, Arabs, Armenians and Sephardic Jews, but it has been observed in lower frequencies throughout the Mediterranean area. Pyrin, an integral component of the pyrin inflammasome, is encoded by MEFV (Mediterranean Fever), the gene that is mutated in patients with FMF, and differently affects the disease phenotype and the risk of developing renal amyloidosis. To date, 391 sequence variants of the MEFV gene have been recorded, with up to one third of FMF patients carrying only a single or none of the common pathogenic MEFV mutations. Moreover, the clinical/functional relevance of some MEFV alleles is debated sometimes resulting in inconclusive genetic analysis. This special issue aims at publishing cutting-edge research on the FMF pathophysiology, genotype-phenotype correlation, genetic epidemiology, and disease modifying factors.

### Guest Editor

Dr. Gernot Kriegshäuser  
IHR LABOR, Medical Diagnostic Laboratories, Vienna, Austria

### Deadline for manuscript submissions

closed (20 April 2024)

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Organic Chemistry)
