Protein Kinases in Metabolic Disorders

Message from the Guest Editors

The aim and scope of this Special Issue is to create a dedicated space for original research papers or reviews on the aberrant signaling of protein kinases involved in sustaining the development of metabolic disorders. The issue will include both metabolic diseases with genetic origin (such as Gaucher disease and familial hypercholesterolemia) and those of non-genetic origin (such as diabetes, fatty liver disease, metabolic syndrome). It will also be possible to consider papers on protein kinases involved in obesity and obesity-related metabolic diseases.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
