Estrogen Receptor α -Negative Breast Cancer: Pathology and Genetics for Novel Therapeutic Approaches

Message from the Guest Editors

This special issue of the International Journal of Molecular Science, entitled “Estrogen Receptor α -Negative Breast Cancer: Pathology and Genetics for Novel Therapeutic Approaches”, focuses on steroid and peptide hormone signaling, interactions with stromal cells such as immune cells, the involvement of cytokine signaling, chemotherapy resistance mechanisms, elucidation of genetic background and treatment, and so on. We also very much would like to welcome postdocs, students, and young researchers to our journal.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
