

## Special Issue

# Molecular Advances in Chronic Pain: Mechanisms and Therapeutic Innovations

### Message from the Guest Editor

This Special Issue focuses on advances in understanding and managing chronic pain, a common issue in various musculoskeletal and rheumatic conditions. Chronic pain represents a complex challenge that requires a multidisciplinary approach to fully comprehend its underlying mechanisms and to develop new therapeutic strategies. We invite contributions that explore pain mechanisms, from biological and molecular foundations to neurological and psychological influences, as well as innovative studies on pain management. This collection is aimed at all professionals interested in improving the quality of life of patients suffering from chronic pain, offering solutions that combine cutting-edge research with clinical applications. Since IJMS is a journal of molecular science, pure clinical or model studies will thus not be suitable for our journal. But, clinical or pure model submissions with biomolecular experiments are welcomed.

## About the Journal

### Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
