

Special Issue

Advances in Novel Anti-Alzheimer Drugs: Biological Target, Medicinal Chemistry and Formulation

Message from the Guest Editors

The aim of this Special Issue is to bring together the latest discoveries in the field of anti-Alzheimer drug design, from the discovery/validation of new biological targets to the synthesis and characterization of new molecules of therapeutic interest and the development of formulations capable of delivering active principles to the brain. Particular attention will be paid to translational approaches. The development of new methods in these research areas will also be considered. The submission of original research papers and reviews on this broad and relevant topic is warmly welcomed.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Organic Chemistry)
