Recent Progress in Metabolic Diseases

Message from the Guest Editor

Metabolic diseases are one of the main causes of mortality in the global population. Their etiology is very diverse, but always related to metabolic alterations at the molecular level. Many of these diseases are caused by abnormalities in the function of enzymes, the activity of which determines the course of biochemical reactions, which are components of catabolic or anabolic pathways. Considering the above, it is obvious that progress in the prevention, diagnosis, and treatment of metabolic diseases will not be possible without intensive scientific research that will clearly explain their causes at the molecular level, but will also enable the development of diagnostic and therapeutic strategies. With this in mind, I am pleased to invite scientists involved in the molecular research of metabolic diseases to publish their latest achievements in this Special Issue.

Guest Editor

Prof. Dr. Dariusz Chlubek

Department of Biochemistry and Medical Chemistry, Pomeranian Medical University, Szczecin, Poland

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
