

Special Issue

Protein Folding, Misfolding, and Age-Related Disease

Message from the Guest Editor

This Special Issue aims to bring together research and review articles on molecular aspects of protein folding and misfolding. It also seeks to highlight new discoveries, approaches, and technical developments in research on protein folding and homeostasis. By providing an open platform for sharing original research addressing molecular aspects of protein folding and misfolding, we hope to advance our understanding of their roles in aging and age-associated diseases and to facilitate the development of novel diagnostic and therapeutic approaches. Topics of this Special Issue include but are not limited to:

- Protein aggregation;
- Protein aggregation biomarkers: screening, diagnosis, treatment response, and prognosis;
- Key biological processes that alter protein folding such as chaperones, stress, inflammation, or changes in autophagy and ubiquitin/proteasomal pathways;
- Bioinformatic approaches to understanding the protein folding process;
- Small molecule development and intervention to prevent or reverse protein misfolding and aggregation;
- Contribution of disordered proteins to protein homeostasis.

About the Journal

Message from the Editor-in-Chief

The *International Journal of Molecular Sciences (IJMS)* is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, and molecular biophysics. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. José L. Quiles
Department of Physiology, Institute of Nutrition and Food Technology
"Jose Mataix", Biomedical Research Center, University of Granada,
Avda. Conocimiento s/n, 18100 Armilla, Granada, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)
